Come and Learn About...

Insect biodiversity - what role moths play?

Moth conservation - what is being done to protect moths?

The economics of moths - what happens when moths go bad?

Research on moths - what are we finding out from genetics studies?

Special species - what do the moths of the Pine Barrens tell us?

What is the Underwing Story?

Moths prepare for winter, too.

Caterpillar behavior - how not to be eaten.

Poetry about moths - why not?

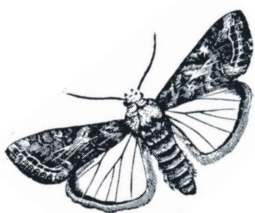

Photo courtesy of Dave Wagner

Seven Moth experts will gather (like moths...?) to share their knowledge, collections, poetry and humor about the fascinating world of discovering moths.

Join
